We have no means by which to compare VOC = 0.2 ppm to any particular health levels other than 5 ppm for worker H&S.

Subject: EU Agreement????? RE: Air Monitoring Table

Air monitoring data has been collected by EPA around the Arkema facility for the health and safety of response personnel and the local community. The air data revealed very low detections for sulfur dioxide on August 31 and September 01. Sulfur dioxide has not been detected since September 1, 2017. On September 3, VOC was detected but at approximately 25 times less than the level of concern.

How about...

Air monitoring data has been collected by EPA around the Arkema facility for the health and safety of response personnel **and the local community right?**. The air data revealed very low detections for sulfur dioxide on August 31 and September 01. Sulfur dioxide has not been detected since **????**. On September 3, VOC was detected but at approximately 25 times less than the level of concern.

Jon/Philip – David Gray is requesting we developed some statements about what the attached data means. We do not want the public or the media interpreting the data for us. Mary asked the EU to craft a statement explaining the data?

She would like something by 2:00 today.

Subject: Air Monitoring Table

Good evening,

Please see updated air monitoring table for surveys completed thus far. I have crews out on a continuous basis monitoring so I'm updating as we go. If you have any questions or concerns, please give me a call.

Respectfully,

Toryus K. Brantley
